

# Richmond Cycle Hub

Located within the Richmond station car park, our new cycle hub has been developed with a strong focus on biodiversity, the circular economy, decarbonisation, and supporting the local economy. Wherever possible, materials have been locally sourced and pre-cut, helping to minimise carbon emissions, reduce waste, and lower on-site energy use.

**1,500**

litre rainwater harvesting system  
for self-watering green wall

**63**

solar panels  
powering the hub

**24,500 kWh**

of renewable energy  
potential every year

**60m<sup>2</sup>**

of living green wall  
to enhance urban biodiversity

**80m**

of curbing  
made from recycled plastic

**4,000**

plants  
supporting local pollinators  
and air quality

**1 tonne**

of recycled plastic  
used for curbing and drainage

**14** full time  
jobs

for local South England workers

**2** apprentices

gained on-site experience

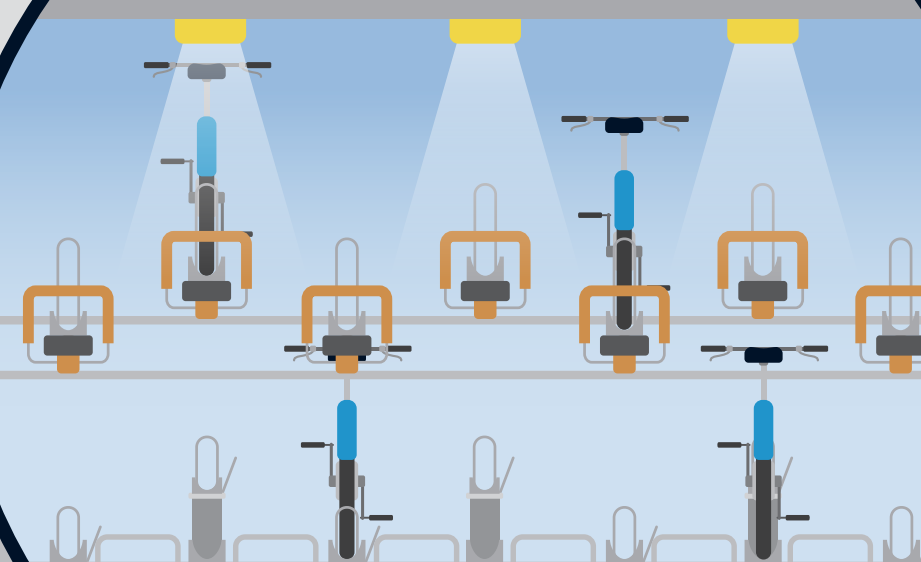

**1** team member  
trained

in heavy machinery operation

**100%**

smart LED lighting

**658**

cycle spaces  
to encourage sustainable travel
