

Energy Policy

Mark Hopwood
Managing Director
February 2020

As a major transport operator, we have central role in providing governments and local communities with sustainable, low carbon transport modes to reduce the sector's contribution to climate change.

We are committed to operate our trains efficiently and promoting increased utilisation of our services. At the same time, we recognise the environmental impacts arising from our business activities and are committed to reducing these through effective environmental and energy management.

Our key energy commitments are:

- Maintaining an internal management structure for energy issues
- which includes clearly defined responsibilities;
- Complying with, and where possible exceeding, applicable legal and other requirements relating to the organisation's energy use, consumption and efficiency;
- Actively promoting improved energy and fuel efficiency within the business;
- Reporting on our energy performance and setting objectives and targets for improvement;
- Actively promoting improved energy and fuel efficiency within the business;
- Seek to implement an Energy Management System in accordance to the ISO50001 standard;
- Continuously improve our energy performance by supporting the purchase of energy efficient products and services;
- Providing appropriate training to our staff.

A handwritten signature in black ink that reads "Mark Hopwood". The signature is fluid and cursive, with a long horizontal stroke at the end.
